SUMMARY

Computer Science sophomore at VIT Vellore (2023–2027) with production internship experience at a Reliance Industries subsidiary. Proficient in C++, Python, Java, and full-stack development (MERN, Next.js). Strong grounding in Data Structures & Algorithms, distributed systems design, and scalable architecture. Seeking a Software Engineering Internship to build high-impact products at scale.

EDUCATION

B.Tech in Computer Science and Engineering

Vellore Institute of Technology (VIT), Vellore

Aug 2023 – Jul 2027

CGPA: 8.30 / 10

TECHNICAL SKILLS

Languages	C++, Python, Java, JavaScript, TypeScript
Frameworks	React.js, Next.js 15, Node.js, Express.js
Databases	PostgreSQL, MongoDB, Redis
Cloud & DevOps	Docker, AWS (EC2, S3), REST APIs, Microservices
Tools	Git, GitHub, Prisma ORM, Postman
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

Full-Stack Developer Intern

Enercent Technologies Pvt. Ltd. (A Reliance Industries Subsidiary)

Jun 2025 – Aug 2025

Bengaluru, India

- Engineered production-grade frontend and backend modules for enterprise web applications, delivering end-to-end features across the full stack within a 2-month engagement.
- Designed and integrated RESTful APIs with responsive React UI components, contributing to proprietary technology initiatives under enterprise IP and security standards.
- Collaborated with cross-functional engineering teams in an agile environment to accelerate feature delivery and maintain code quality on a production codebase.

Technical Head

Bulls & Bears Finance Club, VIT Vellore

Jan 2025 – Jan 2026

Vellore, India

- Architected and deployed two full-stack event platforms (Dalal Street and Cashflow) serving 550+ participants across Yantra Tech Week and GraVITas'24.
- Led a team of 5 engineers to build live IPO simulations, dynamic stock pricing algorithms, and real-time portfolio management modules using React, Node.js, and MongoDB.
- Directed technical roadmap and delivery for a 170+ member club, aligning engineering milestones with event timelines and stakeholder requirements.

Technical Secretary, Student Council

Vellore Institute of Technology

Aug 2023 – Present

Vellore, India

- Oversaw technical planning and execution for institute-level events, coordinating across 100+ clubs to streamline event registration systems and digital workflows.
- Served as primary technical liaison between 5,000+ student body, technical teams, and faculty administration, resolving operational blockers under tight deadlines.

PROJECTS

ParkFlow – Smart Parking Management System

Next.js 15, Node.js, PostgreSQL, Redis, Docker

- Architected a microservice-oriented parking platform featuring real-time slot tracking, automated billing, EV charging queue management, and an analytics dashboard built for operational scale.
- Implemented Redis caching for low-latency read operations and leveraged Prisma ORM with PostgreSQL for relational data modeling; containerized all services with Docker for reproducible deployments.

CollabCode AI – AI-Powered Collaborative Coding Platform

React, Node.js, WebSockets, AI APIs

- Built a real-time collaborative IDE supporting simultaneous multi-user code editing with conflict resolution, synchronized via WebSockets at sub-100ms latency.
- Integrated AI-driven code assistance, sandboxed code execution, and OAuth-based authentication, improving developer productivity and collaboration across distributed teams.

Dalal Street – Live Stock Market Simulator

React, Node.js, MongoDB, REST APIs

- Engineered a live trading platform with real-time dynamic pricing, IPO simulations, and portfolio management; scaled to 300+ concurrent users during Yantra Tech Week with zero downtime.

Cashflow – Financial Simulation Platform

React, Node.js, MongoDB

- Designed and led development of a virtual investment simulation platform for VIT GraVITas'24; managed a 5-engineer team and onboarded 250+ students through interactive trading workflows.
